

KAVISANAH KANAKESHWARAN

Software Engineering Intern

+94 763 278 153 · kanakeshwarankavisanah@gmail.com · [LinkedIn](#) · [GitHub](#) · Colombo

PROFILE SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with solid hands-on full-stack development experience. Proficient in building end-to-end web applications using Spring Boot, React.js, Node.js, and Docker, with a focus on scalable architecture, REST APIs, and secure role-based access systems. Eager to contribute to a collaborative, fast-paced engineering team.

EDUCATION

University of Kelaniya	April 2024 – Present
B.Sc (Hons) in Software Engineering GPA: 3.74 / 4.00	
G.C.E Advanced Level Examination	2022
Chemistry – A Physics – C Combined Mathematics – B	

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML & CSS, C, PHP	Security & Auth: JWT, Spring Security, Role-Based Access Control
Frameworks & Libraries: Spring Boot, React.js, React Native, Node.js, Express.js, Next.js	AI & APIs: Groq API, REST APIs
Databases: MySQL, MongoDB	Core Concepts: OOP, SOLID Principles, Data Structures & Algorithms
Tools & Platforms: Git & GitHub, Docker, Postman, Vercel	

PROJECTS

AI Interview Coach	Apr 2026 – May 2026
Individual Project React.js, Node.js, Express.js, MongoDB, Groq API, Tailwind CSS Source Code Live Demo	
- Developed a mock interview platform that parses uploaded resumes and uses the Groq API to generate dynamic, role-specific interview questions tailored to the candidate's profile. - Delivered personalised, actionable feedback to help users improve technical communication and interview readiness. - Deployed the platform publicly on Vercel, making the full interview simulation experience accessible end-to-end.	
MediRemind	Mar 2026 – May 2026
Individual Project React.js, Tailwind CSS, Spring Boot, Spring Security, MySQL, JWT, Docker Source Code	
- Built a secure, role-based platform for managing medication schedules, tracking adherence, and booking medical appointments. - Implemented automated reminder notifications using Spring Boot and a fully responsive React.js frontend. - Containerised the full-stack application with Docker for consistent, reproducible deployment across environments.	
Book Fair Management System	Oct 2025 – Jan 2026
Group Project React.js, Spring Boot, Tailwind CSS, Framer Motion, JWT, MySQL, ZXing Source Code	
- Developed a full-stack web platform for digitised stall reservations, enabling vendors to browse genre-based stalls, book online, and process payments. - Implemented JWT authentication with role-based access control and a QR-code-based entry verification system sent to vendors via email. - Built an admin dashboard for real-time stall availability tracking, reservation management, reporting, and refund processing.	

SOFT SKILLS

Strong Problem-Solving Skills	Quick Learner
Collaborative Team Player	Adaptability & Flexibility
Effective Communication	

LANGUAGES

English – Proficient	Tamil – Native
